Professional summary

Write a descriptive summary that speaks about your interests and experience.

PROFESSIONAL SUMMARY

Perspective Data Analyst who strives to pose and answer questions with Quantitative driven insights. Through development of personal projects and valuable internship, I have learned the importance of having an interactive, hypothesis oriented approach to analysis. I am eager to leverage that Approach at organization as a data analyst.

Professional Experience

Write a descriptive and industry relevant experience

Data is Good

Data Analyst ,Statistical Analyst.

Noida

May 2022 - Present

- Working as a Data analyst with the organization Data is Good, where I performed data handling techniques to analyze the data and identify the key insights from the data.
- Prepare the dashboard on data by using various data handling tools, cleaning, data wrangling, visualization, etc.
- Executing EDA on datasets, extracting insights from them, preparing the dataset for training, and evaluating the applicability of the appropriate model.

Rational Engineers ltd.

Maintenance Engineer

Mumbai

2019 - 2022

- Predicting and carrying out a preventative maintenance program for plant machinery according to running machine hours and visual inspection of machine performance as per ISO :2015.

Technical skills

Mention atleast a minimum of 12-15 relevant technical skills.

TECHNICAL SKILLS

PYTHON | SQL | ADVANCE EXCEL | TABLEAU | POWER BI | NUMPY | PANDAS | MATPLOTLIB | SEABORN | STATISTICS
MACHINE LEARNING | NLP | WEB SCRAPPING

Soft skills

Mention a minimum of 7-10 technical skills.

SOFT SKILLS

ATTENTIVENESS | SELF-AWARENESS | TIME MANAGEMENT | ADAPTIBILITY | PROBLEM-SOLVING | TEAMWORK
COMMITMENT

Education

- Don't write about your highschool and intermediate.
- Don't write about your CGPAs and Percentages.
- Describe your education in a line or two.

Professional Data Science and Machine Learning with Python
DataIsGood

- Data Science Certification Program to learn Data.
- Machine learning for model building.
- Analysis, Exploratory Data Analysis, Data Visualization.
- Data cleaning by different methods.

Bachelor of Arts
 Mahatma Gandhi University Meghalaya

- Learned core concept of creating artificial images over the raw images.
- Creating 3D model implementing it in 2D frames.
- Major: visual Effects
- Making of digital design with the help of different Software's.

Certifications

Mention whatever relevant certifications you have obtained.

This is a mandatory section, don't skip it.

- Got a certification in **Python Basic** from HackerRank.
- Got a certification in **Tableau Bootcamp** conducted by DataIsGood.
- Got a certification in **Mastering Python in Data Structures** from DataIsGood.
- Got a certification in **Problem Solving Basic In Python** from HackerRank.
- Got a certification in **SQL Basic** from HackerRank.
- Got a certification in **Excel Fundamental** from DataIsGood.
- Got a certification in **Python Fundamental** from DataIsGood.
- Got a certification in **Course on Computer Concept** from DOEACC

If you don't have any certifications then you can acquire some of them from free platforms and put it.

Internships

Mention about your relevant internships(IF ANY).

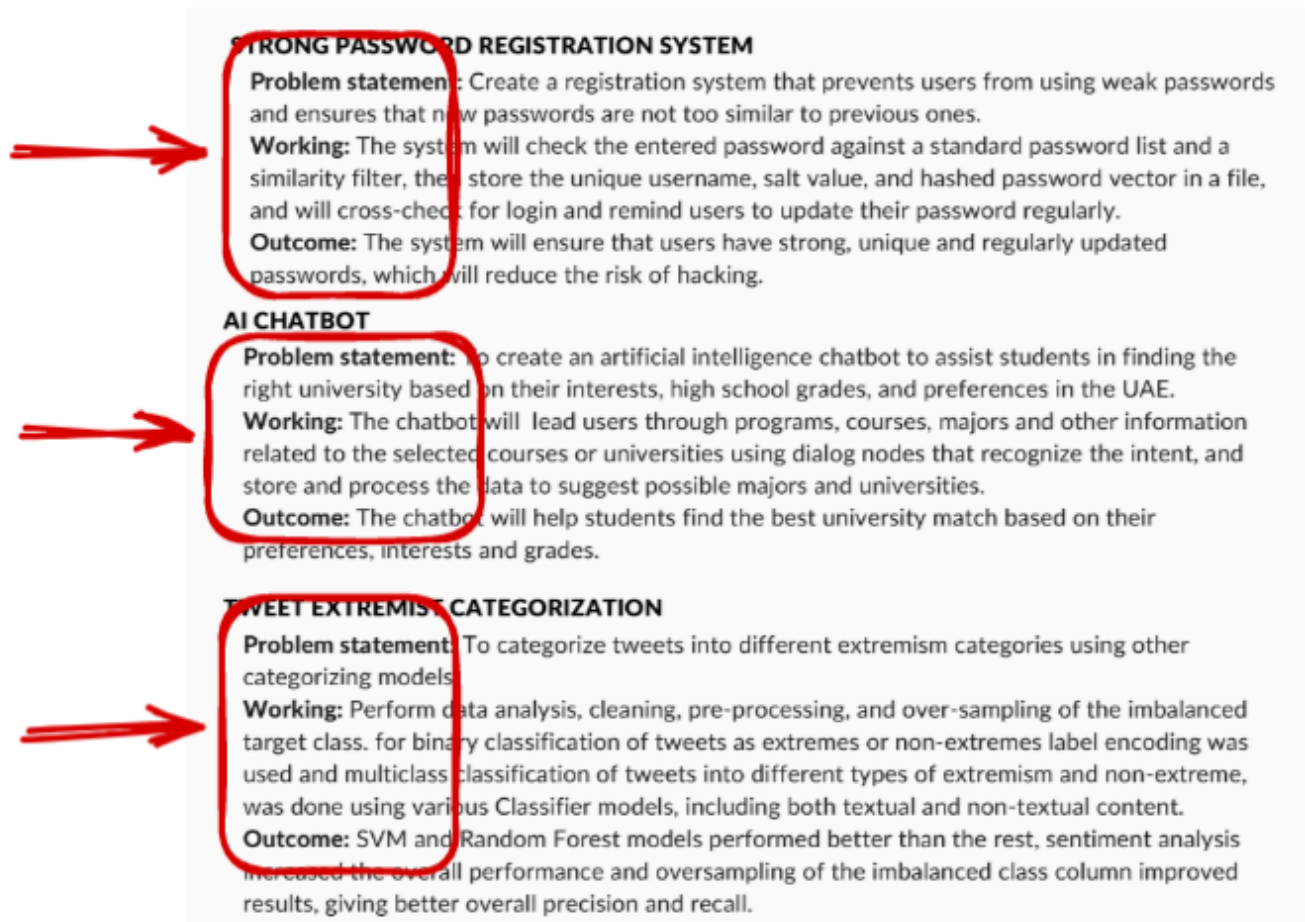

INTERNSHIP
~~Internship~~ **September 2022 – December 2022**

- Articulate storytelling to business & product stakeholders.
- Familiarity with various Machine-learning models.
- Share knowledge and insights with the Data Science team.
- Database knowledge and expertise in SQL also a plus.

Projects

- **This is the most important part of the resume for a Data Scientist.
- You need to mention a minimum of **6 projects**.
- Your projects should be divided into three parts.

- *Remember you should be well versed in all the projects you mention in your resume. You will surely be asked questions from the projects you mention.

STRONG PASSWORD REGISTRATION SYSTEM

Problem statement: Create a registration system that prevents users from using weak passwords and ensures that new passwords are not too similar to previous ones.

Working: The system will check the entered password against a standard password list and a similarity filter, then store the unique username, salt value, and hashed password vector in a file, and will cross-check for login and remind users to update their password regularly.

Outcome: The system will ensure that users have strong, unique and regularly updated passwords, which will reduce the risk of hacking.

AI CHATBOT

Problem statement: To create an artificial intelligence chatbot to assist students in finding the right university based on their interests, high school grades, and preferences in the UAE.

Working: The chatbot will lead users through programs, courses, majors and other information related to the selected courses or universities using dialog nodes that recognize the intent, and store and process the data to suggest possible majors and universities.

Outcome: The chatbot will help students find the best university match based on their preferences, interests and grades.

TWEET EXTREMIST CATEGORIZATION

Problem statement: To categorize tweets into different extremism categories using other categorizing models.

Working: Perform data analysis, cleaning, pre-processing, and over-sampling of the imbalanced target class. for binary classification of tweets as extremes or non-extremes label encoding was used and multiclass classification of tweets into different types of extremism and non-extreme, was done using various Classifier models, including both textual and non-textual content.

Outcome: SVM and Random Forest models performed better than the rest, sentiment analysis increased the overall performance and oversampling of the imbalanced class column improved results, giving better overall precision and recall.

Template

- First and foremost is a simple and subtle template.
- Don't add any colours to your resume.
- Choose the easiest font (ex- Arial, Calibri, Deja Vu Sans).
- The font size should be no more than 11.
- Let's take a look at how your resume should look like overall.
